1 OOo integration

This is a first draft of how a tighter integration with OOo could be done, which would form the basis for more advanced functionality later on.

At present, this amounts to a set of hopefully useful links to the OOo api documentation:

- <http://api.openoffice.org/docs/common/ref/com/sun/star/module-ix.html>
- <http://api.openoffice.org/docs/common/ref/com/sun/star/linguistic2/module-ix.html>
- <http://api.openoffice.org/docs/common/ref/com/sun/star/text/module-ix.html>
- <http://api.openoffice.org/docs/common/ref/com/sun/star/text/GenericTextDocument.html>

Regarding the user interface, [LanguageTool](#) could be a source for inspiration, and possibly code + cooperation.
